

January 3, 1948.

Dr. Evelyn Witkin,
Department of Genetics,
Carnegie Institution of Washington,
Cold Spring Harbor, L.I., N.Y.

Dear Evelyn,

Dr. Bernard Davis has just told me about your proposal to edit a "Bacterial Genetics Information Service." I am delighted with this proposal; certainly such a service could probably be better set up at Cold Spring Harbor than elsewhere, because of the experience with the *Drosophila* Information Service. Please count on my enthusiastic support for this venture.

Yours sincerely,

Joshua Lederberg,
Assistant Professor of Genetics.
